

The Bravo Range

The Britcab 'Bravo' range has been designed with your security and comfort in mind. These low maintenance security buildings are value engineered to provide long life durability, defeat unauthorised entry and combat vandalism in the most remote areas.

BRAVO 
by Britcab www.ukcabins.com

External Walls

The external walls are multi-profiled 1.6mm thick pressed steel panels, welded to one another and the structural frame. The steel is fully compliant with BS1449 HR4. All roof seams, edges and lower wall perimeter are guarded with a heavy rust prohibitive paint. The exterior of the unit receives one high build coat of paint in a variety of optional colours. The walls have an increased U-Value to 0.25w/m2 with upgraded framing - deeper cavity and increased insulation and 300mm taller than std.

Interior Finish

Internal finishes are installed on 50mm x 50mm Galvanised MF framing on which is embossed vinyl wall covering, laminated to 12.5mm plasterboard and providing a class 'O' surface spread of flame with extruded plastic joint strips. Wall cavities are insulated with 25mm fibrous insulation which allows for air flow. Natural trickle ventilation is achieved by the incorporation of high level permavents.

Floor Construction

Tongue and grooved 18mm treated chipboard flooring supported by 100x50x3mm joists at 436mm centres and, in turn, the unit bottom rail. The steel is fully compliant BS1449 HR4. The floor covering is a heavy-duty flexible sheet vinyl, with continuously welded joints and is bonded to the floorboards. Floors are designed to provide for a uniform floor loading of 2.5kn/m2. The floor has an increased U-Value to 0.17w/m2 with additional floor depth and insulation to overcome cold bridging.

Dual Pitch Roof

Roof panels of 1.6mm thick pressed steel, fully welded and supported by steel roof bows. An additional central support is also provided to give a positive camber to the roof to prevent ponding of water. (Steel is full compliant with BS1449 HR4). Internal finishes are installed on 'G' section ceiling joists, on which is embossed vinyl covering, laminated to 12.5mm plasterboard and providing a class 'O' surface spread of flame with extruded plastic joint strips. Roof cavities are insulated with 90mm non-combustible fibrous insulation and provides a 'U' Value of 0.49. The roof has an increased U-Value of 0.18w/m2 which incorporates air gaps and additional insulation.

External Doors and Shutters

Galvanised steel kirncroft security door with 10 point horizontal and vertical bolts and euro profile multipoint locking system - with stainless steel lever handle. Maintenance free aluminium framed polyester powder coated windows. Kirncroft galvanised steel/security side opening shutters. The windows are upgraded to double glazed and now incorporating argon filled glass.

Standard Electrics

All cabins are fitted with consumer unit, inlet box, LED lighting and 3.2kw Air Sourced Heat pump unit. Our new build range also include 13amp twin sockets with 2 outlet USB chargers built in - handy for charging mobile phones. All Electrics are hardwired within the fabric of the building.
